

IEEE

ECE 5/4973 Summer 2025
Tuesday- Thursday 10:30- 11:35 (CST)

Standard Electrical & Electronic Engineering (SEEE)

Instructor: Dr. Reza Saeed Kandezy

Why Take SEEE?

We're addressing a major gap between classroom learning and industry execution: the practical use of IEEE standards in real engineering systems. SEEE is designed to prepare students to think, design, and document like professionals—grounded in safety, compliance, interoperability, and system architecture. Standard Driven Engineering Execution and Empowerment is a long-term vision for equipping engineers with the tools and mindset to lead in high-impact, standards-based design environments.
